DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-21 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 1-21 are allowed over the prior art of record. The prior art fails to teach or suggest a method and an apparatus for monitoring the output of the DACs that implement a plurality of on-chip channels, a digital-to-analogue converter (DAC) located in each channel, each DAC having an analogue output, an on-chip digital input port for receiving digital data, an on-chip interface and control logic circuit for receiving digital data from the digital input port and for selectively applying the digital data to the DACs for conversion thereof to analogue output signals, an on-chip monitoring output terminal, and an on-chip switch network coupled to the on-chip monitoring output terminal and to the analogue outputs of at least some of the DACs, the switch network being operable under the control of the interface and control logic circuit for selectively switching the analogue output signals from the at least some of the DACs to the monitoring output terminal for facilitating external monitoring thereof.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not relied upon is considered pertinent to application's disclosures. The cited references relate to multi-channel integrated circuits.
